

Robert Matliff

Rob Maliff has been assisting healthcare organizations with capital, strategic, and safety initiatives for more than 20 years. As a Director in ECRI's Applied Solutions Group, he leads that groups programs supporting clinical alarms, patient safety, value analysis and capital planning, as well as technology management programs. Recently, he has assisted a nationwide health system in addressing and improving its management of cardiac alarms; he has coordinated capital request reviews for millions of dollars of medical equipment; and he has reorganized clinical and support departments to increase patient safety, improve operations and reduce costs. He has an MBA in Health Administration from Temple University and a Bachelors in the Science of Engineering from Duke University. He is an active member of Healthcare Information and Management Systems Society (HIMSS) and the American College of Clinical Engineering.
