

**THE ASSOCIATION FOR HEALTHCARE RISK MANAGEMENT
OF NEW YORK, INC.
CORDIALLY INVITES YOU A NEW WEBINAR**

Friday, November 6, 2020 | 10:00-11:30 AM

**LOOKING BEYOND:
THE FUTURE OF POST-PANDEMIC LONG TERM CARE**

The impact of Covid-19 has been devastating. Among the most effected by the pandemic are our nation's long-term care (LTC) residents. This webinar will discuss lessons from the pandemic: how did we get here and what can we do to improve LTC health outcomes and experiences post-pandemic.

The teaching goals of this webinar are to:

- Examine lessons that have been learned from the pandemic that can be made a permanent fixture of the delivery of quality healthcare across the acute and long-term settings, including establishing collaborative partnerships between LTC facilities, hospitals, and adoption of telemedicine;
- Demonstrate that the calls for nursing home reform via increased staffing and regulatory oversight do not address the issues of how elder care is delivered in the United States.

OUR GUEST SPEAKERS

Dylan Braverman
Partner
Vigorito Barker Patterson
Nichols & Porter, LLP

Lawrence (Larry) Diamond, MD
Geriatrician, Post Acute and
Long-Term Care

Mario C. Giannettino
Partner
