

Dr. Jared Kutzin is the Director of Simulation at Winthrop University Hospital and sits on the institution patient safety committee. Jared is a registered nurse with advanced degrees in health policy and management, public health, leadership, and medical education. In 2012, Jared completed the clinical quality fellowship program (CQFP) offered by the Greater New York Hospital Association and the United Hospital Fund.

Jared has presented at and served on the planning committee for the International Meeting for Simulation in Healthcare (IMSH) and the National Patient Safety Foundation (NPSF) Annual Congress. In addition, he has presented at the Association of PeriOperative Registered Nurses (AORN) conference, the Association for Professionals in Infection Control and Epidemiology (APIC) conference, and the International Association for Clinical Simulation and Learning (INACSL) meeting, in addition to many local and regional conferences and workshops.

Jared is a past chair of the Nursing Section of the Society for Simulation in Healthcare (SSH) and serves on their membership, certification, and public affairs and government relations committees.

Jared's research interests include investigating the human factors that affect the quality and safety of healthcare, the quality and safety of pre-hospital care, and the use of simulation as an educational method.

Robin Lynch is the Manager of the Simulation Center at New York-Presbyterian Hospital/Columbia University Medical Center. She was awarded her Master of Science in Nursing Education from the State University of New York Institute of Technology and her baccalaureate of science in nursing from the University of Texas in Austin. Prior to accepting a position at New York Presbyterian, she was the manager and simulation instructor at the College of Health Professions Clinical Education Labs at Pace University in NYC. While at Pace, she collaborated on integrating simulation education into their undergraduate and graduate curriculum and developing their standardized patient program. She is actively involved with the Society for Simulation in Healthcare and the International Nursing Association for Clinical Simulation & Learning. She has presented on topics in simulation including interprofessional education, curriculum integration and change management.
