

**The Association for Healthcare Risk Management
of New York, Inc.**

**Invites you to our first webinar in 2024 on
Thursday, March 28th | 12:00 - 1:30 PM**

Featuring three Dynamic Presenters

LIVE WEBINAR

Artificial Intelligence: The Risk is not Artificial

Attendees of this webinar will learn to:

- Recognize and define the types of artificial intelligence used in healthcare organizations and the importance of understanding their function as it relates to risk mitigation and loss control.
- Explore how AI is impacting the insurance industry and handling of medical malpractice claims.
- Describe areas of vulnerability, including ethical considerations in the use of AI, and legal and risk mitigation strategies.

This program is being reviewed for CPHRM and CLE Credits by the American Society for Health Care Risk Management and the New York State CLE Board
